PRACTICAL 1: INTRODUCTION AND CONTRIBUTION TO WIKIPEDIA

a) Description about Wikipedia and its features.

- Overview

  Wikipedia is an online free-content encyclopedia project helping to create a world in which everyone can freely share in the sum of all knowledge.
   It is supported by the Wikimedia Foundation and based on a model of freely editable content.
  The name "Wikipedia" is a blending of the words *wiki* (a technology for creating collaborative websites, from the Hawaiian word *wiki*, meaning "quick") and *encyclopedia*.
  Wikipedia's articles provide links designed to guide the user to related pages with additional information.
  Wikipedia is written collaboratively by largely anonymous volunteers who write without pay.
   Anyone with Internet access can write and make changes to Wikipedia articles, except in limited cases where editing is restricted to prevent disruption or vandalism.

Wikipedia features

- Wikipedia has many features for the users on the web. Wiki provides pieces of answers from different resources, to help the user see it from different perspectives. If someone doesn't understand what one editor says, there're always a few more editors with the same answer but with a different response.
- More Features…
  - Users around the world are able to add or delete an answer to make the best response. Wiki added a new feature called vector, which is stylish tabs at the top of each page telling the user whether they're viewing a document or a discussion page.
  -This feature also reminds them if they're reading or editing an entry. Wikipedia is a community effort to create the best answers possible; there are different viewpoints for the user to read.
- Supported Applications

Many applications are necessary in order for Wikipedia to function properly. Javascript must be installed on your computer during your research process for the language to be visible and understandable to the reader.

- How Wikipedia is Used
  Wikipedia can be used in various ways. Companies such as Red Ant, a Sydney, Australia based web design and development firm, and Sun Microsystems all benefit from using Wikipedia.
 Wikipedia is used as a focal point of the web for employees and customers. Employees use Wikipedia to attach files, update web pages and integrate information for their job.
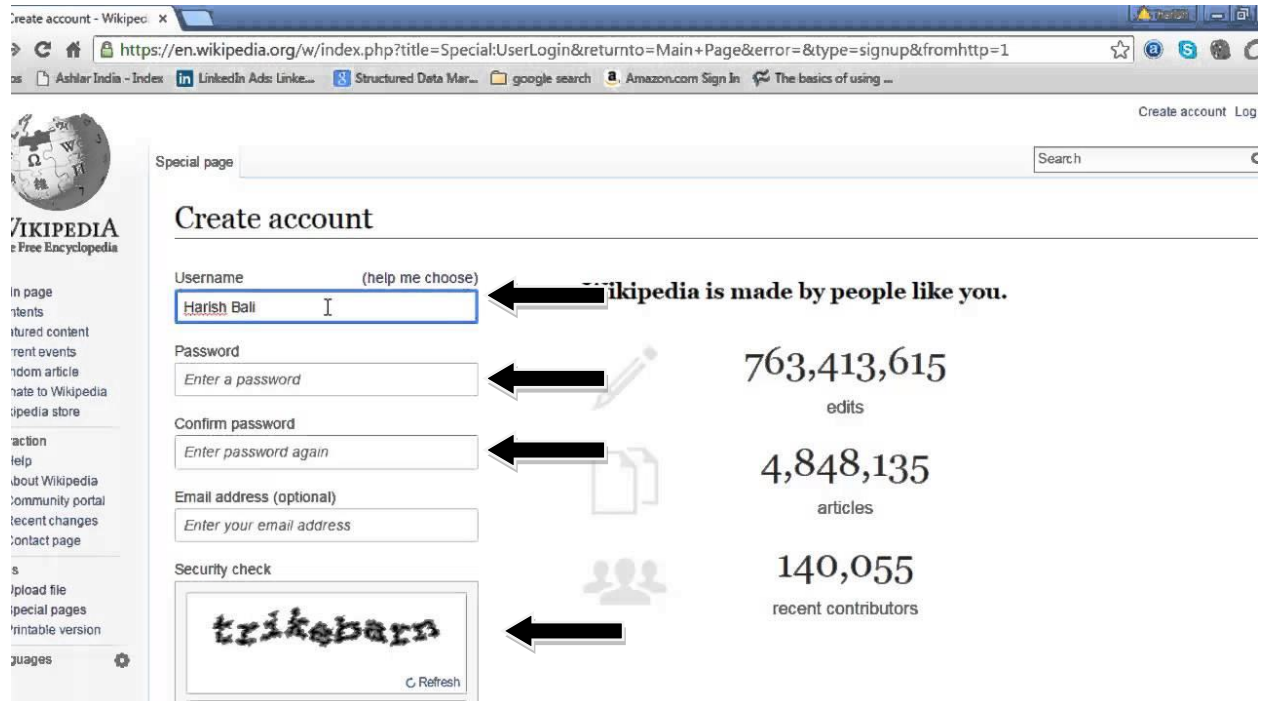

- Where Can It Be Purchased
